

Amendments to the claims:

The listing of claims will replace all prior versions and listings of claims in the application.

Listing of claims:

Claims 1-28 (canceled without prejudice or disclaimer).

Claim 29 (currently amended) A lubricating composition of matter comprising a polymer, where said polymer comprises essentially of a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface ~~decreasing friction between moving surfaces wherein said material for decreasing friction is a petroleum oil, a petroleum oil grease, a solid inorganic compound, a solid organic compound, water containing a lubricant additive, a phosphate, a fatty oil, fatty acid or wax, an isostearyl alcohol containing two oxyethylene groups, a soap, a synthetic oil lubricant which is selected from silicones, polyphenyl ethers, silicates, chlorinated aromatics, fluorocarbons, polyglycol lubricants polymerized olefins, organic esters, or greases thereof, or a mixture of said materials for decreasing friction between moving surfaces~~ wherein said material for lubricating a surface comprises a solid or particulate inorganic lubricant, optionally containing an organic lubricant, or water, or a lubricant additive, or mixtures thereof.

Claim 30 (currently amended) The composition of claim 29 where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a petroleum oil lubricant or grease thereof, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.

Claim 31 (currently amended) The composition of claim 29 where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymer s thereof or mixtures thereof, wherein said inorganic lubricant comprises material for decreasing friction is a solid lubricant, wherein said solid lubricant is an inorganic compound, carbon, or metal that provides barrier-layer lubrication, or mixtures thereof, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.

Claim 32 (currently amended) The composition of claim 31 where said ~~solid~~ inorganic lubricant is graphite, molybdenum disulfide, cobalt chloride, antimony oxide, niobium selenide, tungsten disulfide, mica, boron nitride, silver sulfate, cadmium chloride, cadmium oxide, cadmium iodide, borax, basic white lead, lead carbonate, lead monoxide, lead iodide, asbestos, talc, zinc oxide, zinc phosphate, iron phosphate, manganese phosphate, carbon, babbitt, bronze, brass, aluminum, gallium, indium, thallium, thorium, copper, silver, gold, mercury, lead, tin, indium, or the Group VIII noble metals or mixtures thereof.

Claim 33 (canceled without prejudice or disclaimer).

Claim 34 (currently amended) The composition of claim 29 ~~33~~ where said organic lubricant comprises ~~solid organic lubricant is~~ a fluoroalkylene homopolymer or copolymer, a lower alkylene polyolefin homopolymer or co-polymer, a paraffinic hydrocarbon wax, phenanthrene, copper phthalocyanine, or mixtures thereof.

Claim 35 (currently amended) ~~The composition of claim 29 where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures~~

~~thereof, wherein said material for decreasing friction is water containing a lubricant additive, wherein~~ A lubricating composition of matter comprising a polymer wherein said polymer comprises a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface, wherein said material for lubricating a surface comprises ~~decreasing friction is water containing a lubricant additive wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 36 (currently amended) ~~The composition of claim 29 consisting essentially of a superabsorbent polymer with a material for decreasing friction between moving surfaces, wherein said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof,~~ A lubricating composition of matter comprising a polymer wherein said polymer comprises a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface, wherein said material for lubricating a surface comprises ~~decreasing friction is an oil or greases thereof and water, optionally containing a lubricant additive , wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 37 (currently amended) ~~The composition of claim 29 consisting essentially of a superabsorbent polymer with a material for decreasing friction between moving surfaces, wherein said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, A lubricating composition of matter comprising a polymer wherein said polymer comprises a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface, wherein said material for lubricating a surface comprises decreasing friction is a solid lubricant and water, optionally containing a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 38 (currently amended) The composition of claim 37 where said solid lubricant is graphite, molybdenum disulfide, cobalt chloride, antimony oxide, niobium selenide, tungsten disulfide, mica, boron nitride, silver sulfate, cadmium chloride, cadmium oxide, cadmium iodide, borax, basic white lead, lead carbonate, lead monoxide, lead iodide, asbestos, talc, zinc oxide, zinc phosphate, iron phosphate, manganese phosphate, carbon, babbit, bronze, brass, aluminum, gallium, indium, thallium, thorium, copper, silver, gold, mercury, lead, tin, indium, the Group VIII noble metals, a fluoroalkylene homopolymer or copolymer, a lower alkylene polyolefin

homopolymer or co-polymer, a paraffinic hydrocarbon wax, phenanthrene, copper phthalocyanine, or mixtures thereof.

Claim 39 (currently amended) ~~The composition of claim 29 where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof,~~
A lubricating composition of matter comprising a polymer wherein said polymer comprises a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface, wherein said material for lubricating a surface comprises ~~decreasing friction~~ is a phosphate, and wherein said material for lubricating a surface ~~decreasing friction~~ optionally contains a lubricant additive, ~~wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 40 (currently amended) The composition of claim 39 where said material ~~for phosphate comprises decreasing friction~~ is tricresyl phosphate, zinc phosphate, iron phosphate or manganese phosphate, or mixtures thereof.

Claim 41 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises for decreasing friction is a fatty oil, or fatty acid or wax, or mixtures thereof and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 42 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a said synthetic oil lubricant, or two-mol ethoxylate of isostearyl alcohol, or greases thereof, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 43 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a soap, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 44 (canceled without prejudice or disclaimer).

Claim 45 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a fatty oil, and wherein said material for decreasing friction optionally contains a lubricant additive,~~

~~wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 46 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a fatty acid, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 47 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a wax, and wherein said material for decreasing friction optionally contains a lubricant~~

~~additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 48 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a polymerized olefin, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 49 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is an organic ester, and wherein said material for decreasing friction optionally contains a lubricant~~

~~additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 50 (currently amended) The composition of claim 29 ~~where said lubricating composition consists essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises material for decreasing friction is a synthetic oil lubricant or greases thereof, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.~~

Claim 51 (canceled without prejudice or disclaimer).

Claim 52 (currently amended) A lubricating composition of matter comprising ~~consisting essentially of a polymer wherein said polymer comprises~~ a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface, decreasing friction wherein said material for lubricating a surface comprises ~~decreasing friction is~~ water containing a lubricant additive.

Claim 53 (previously presented) The composition of claim 52 where said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, and wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity-index improver, or foam inhibitor.

Claim 54 (canceled without prejudice or disclaimer).

55 (currently amended) A lubricating composition of matter comprising a polymer, wherein said polymer comprises a superabsorbent polymer that absorbs greater than about 100 times its weight in water combined with a material for lubricating a surface which ~~The composition of claim 31 wherein said solid lubricant comprises the chalcogenides of a non-noble metal optionally containing a lubricant additive, and mixtures thereof and mixtures of said lubricant.~~

56 (previously presented) The composition of claim 37 wherein said solid lubricant comprises the chalcogenides of a non-noble metal and mixtures of said lubricant.

57 (currently amended) The composition of claim 55 34 wherein said solid lubricant comprises the chalcogenides of molybdenum, antimony, niobium, and tungsten and mixtures of said lubricant.

58 (previously presented) The composition of claim 37 wherein said solid lubricant comprises the chalcogenides of molybdenum, antimony, niobium, and tungsten and mixtures of said lubricant.

59 (currently amended) The composition of claim 55 34 wherein said solid lubricant comprises the sulfides of molybdenum, antimony, niobium, and tungsten and mixtures of said lubricant.

60 (previously presented) The composition of claim 37 wherein said solid lubricant comprises the sulfides of molybdenum, antimony, niobium, and tungsten and mixtures of said lubricant.

61 (previously presented) The composition of any one of claims 55, 57, and 59 wherein said mixture comprises a two component mixture of said lubricants.

62 (previously presented) The composition of any one of claims 56, 58, and 60 wherein said mixture comprises a two component mixture of said lubricants.

63 (previously presented) The composition of any one of claims 55, 57, and 59 wherein said mixture comprises a three component mixture of said lubricants.

64 (previously presented) The composition of any one of claims 56, 58, and 60 wherein said mixture comprises a three component mixture of said lubricants.

65 (previously presented) The composition of any one of claims 55, 57, and 59 wherein said mixture comprises a four component mixture of said lubricants.

66 (previously presented) The composition of any one of claims 56, 58, and 60 wherein said mixture comprises a four component mixture of said lubricants.

67 (currently amended) A lubricant composition of claim 29 consisting essentially of a superabsorbent polymer combined with a material for decreasing friction between moving surfaces, wherein said superabsorbent polymer absorbs greater than about 100 times its weight in water and is a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof, wherein said organic lubricant comprises a material for decreasing friction is grease, and wherein said material for decreasing friction optionally contains a lubricant additive, wherein said lubricant additive is an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity index improver, or foam inhibitor.

68 (previously presented) The composition of any one of claims 29-34, 39-50, 55, 57, 59, and 67 wherein said composition is substantially anhydrous.

69 (previously presented) The composition of claim 61 wherein said composition is substantially anhydrous.

70 (previously presented) The composition of claim 63 wherein said composition is substantially anhydrous.

71 (previously presented) The composition of claim 65 wherein said composition is substantially anhydrous.
